SUMMARY

Full Stack Web Developer with a background in Economics and life-long dedication to learning. Effective at combining creativity and problem solving to develop user-friendly applications. Known among staff for strong attention to detail and work ethic no matter the complexity of the project.

TECHNICAL SKILLS

Languages and Applications: HTML5, CSS3, Javascript, JQuery, Bootstrap, Firebase, Node Js, MySQL, MongoDB, Express, Handlebars.js & ReactJS

PROJECTS

The Little Library | github.com/Stimoe/LittleLibrary | powerful-gorge-87557.herokuapp.com

This project was making an application focused around the little libraries that are around neighborhoods. My team and I wanted to add more community to them by turning it into a user controlled library system, that enabled users to checkout books, post reviews and share them with their neighbors.

I mostly worked on the backend setting up the databases and the GET and POST request. And the flow between pages.

For this project we used, Bcrypt, dotenv, express, express-sessions, moment, mysql, and sequelize.

Neon-Rain | github.com/cwheets/neon-rain | <https://neonrain.firebaseio.com>

This was our class final project. We decided to make a game. The game is based off a card game where you move through a dungeon fighting enemies and getting more cards. It was really fun to make, and I am looking forward to keep working on it.

I mostly did back end focused on game logic, what happens when each card is played. It is based in React and hosted on firebase.

For this project we used, Bcrypt, dotenv, express, express-sessions, react, firebase and handlebars.

EXPERIENCE

Assistant warehouse manager 2014 – 2019
Seattle Marine and Fishing Supply
Seattle, WA

Helped manage 15-20 people, focused on shipping and customer service. Primary brought processes to the shipping department that focused on attention to detail, shipping the correct product since there were over 50,000 that we carried, and getting the product to the customer, most of our customers were in Alaska so shipping products there takes extra care.

EDUCATION

Bootcamp Certificate: University of Washington

A 12-week intensive program focused on gaining technical programming skills in HTML5, CSS3, Javascript, JQuery, Bootstrap, Firebase, Node Js, MySQL, MongoDB, Express, Handlebars.js & ReactJS

Bachelors of Arts - Economics and Political Science from Western Washington University
